

COVID-19

+ stay informed

Safe and reliable treatment at home

Optum Infusion Pharmacy is here for your home infusion needs. Home infusions are a safe and reliable way to get treatment and reduce the risk of public exposure during the COVID-19 outbreak.

We know patients may have more safety concerns during this time. At Optum® Infusion Pharmacy, our top priority is your health. During these uncertain times, we remain committed to providing safe and reliable access to care, especially to those who are most vulnerable.

Safety and Precautions

Our nurses have the most current guidance from the Centers for Disease Control and Prevention (CDC). They have the personal protective equipment needed to keep both of you safe.

Nurses are screening patients and themselves for signs of COVID-19. Nurses who show symptoms have been asked to stay home for 14 days and be tested. They are not returning to patient care until they are symptom-free.

Face masks are recommended to be worn by nurses and patients during all other visits. This is to reduce the risk of exposure, even without symptoms. These precautions, along with other guidance from the CDC, promote the safety of our both our patients and nurses.

Our approach is consistent with 'stay at home' and 'social distancing' guidelines from local communities and health experts. If you have any questions, call us at **1-877-342-9352**.
